

[The New World Creators Initiative~©™.] for all living souls on earth.

Summary of the aims of Our Humanitarian Projects.

To establish a global humanitarian project that is easy to implement and aimed at raising humanitarian standards.

The project is based on the Pareto principle (80/20 rule) and aims to give each participant the opportunity to make a positive impact in their community and beyond, while rewarding them financially for their contributions.

Structure of the Project:

1. Main categories (10):

- Food Security
- Education
- Health Care
- Housing
- Employment
- Environment and sustainability
- Social cohesion
- Technology and innovation
- Financial inclusion
- Security and well-being.

2. Subcategories:

Each main category contains 10 subcategories that describe specific initiatives and projects. This provides a focused approach to address community needs.

3. Funding and Reward:

Funding comes from an international community and is distributed based on active participation. For each approved monthly contribution of \$100,000, an expert can earn an additional \$1,000 depending on the impact of their project.

Cost Estimate:

- Initial Monthly Cost (2024): €450,000 (for all categories).
- Annual Cost (to 2030): Growth of 10% per year, with a total cost estimate of approximately €1,006,249,000 for the first year, increasing as the project grows.

Staffing needs:

Several roles are required to manage the project, including project managers, financial analysts, and education and health care coordinators. The total staff cost per country is approximately €24,500 per month.

Implementation:

The project is designed to expand locally and globally, with the ability to operate in different regions and countries. The focus is on working with communities to provide sustainable and ethical solutions.

Conclusion:

This master plan provides a structured and scalable approach to address humanitarian challenges. By giving everyone the opportunity to contribute and benefit, it promotes positive change in society. The goal is to raise humanitarian standards worldwide while respecting the rights and dignity of every individual
